- Wuchakou airfield is 300 meters southwest of Wuchakou Station (approximately 120-10, 46-48), three stations west of Solum (121-24, 46-41) or the Paichengtzu (122-52, 45-37)-Aerhahan (Arahan 119-59, 47-13) Railroad.
- The airfield has two separate landing fields, each about 700 meters long by 300 meters wide. Each field has a paved runway 600 meters by 50 meters which was completed in 1944. The surface of the landing fields is hard, composed of pebbles mixed with soil.
- The airfield, lying on flat land between two small mountains, can be used only by recennaissance, fighter, small-type transport and liaison planes.
- There are no hangars at the airfield.
- There is an undetermined number of round, concrete air raid shelters along the south side of the airfield.
- This airfield is used as a base for planes patrolling the northern part of the Paichengtzu-Aerhshan Railroad and the fortifications in the Wuchakou area.
- The airfield was strategically important at the time of the Nomban Incident (1939), and two fighter companies were stationed at the airfield during that period.

This document is hereby regraded to CONFIDENTIAL in accordance with the letter of 13 October 1278 from the Director of Central Intelligence to the Archivist of the United States. Next Review Date: 2008
